### DETAILED ACTION

#### Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 12-18, drawn to a process.

Group II, claim(s) 19-22, drawn to articles.

 In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- 4. The inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:
- 5. The inventions lack unity because (a) there is no common special technical feature recited by Group I (Claims 12 and 16-18) and Group II (Claims 19-20), and/or (b) the special technical feature is anticipated or obvious over the prior art, and therefore the special technical feature does not define a contribution which each of the inventions makes over the prior art. For example, the special technical feature of Claim 12 is the use of a plastic film placed in a mold, a fiber mat is placed on the film, molding takes place, and after cooling the material is removed and comprises the reinforced material connected to the film. However, Rohrbacher (USPN 4959189) teaches a plastic film (3:22) placed in a mold (Fig. 5) with an SMC fiber mat (Fig. 5, item 1), molding the SMC onto the film (4:45-58), to form a composite material, with the film and SMC material being connected in the claimed manner. Cooling would be obvious because

Application/Control Number: 10/507,402

Art Unit: 1791

the material would obviously be cooled from its elevated molding temperature (140 to 160  $\rm C$ )

Page 3

before removing it form the mold and subsequently using the article for its intended purposes

(4:54-58). Thus, in view of the Rohrbacher reference, the inventions lack unity with each other

because the special technical feature does not define a contribution which both inventions make

over the prior art.

6. There would be a serious search and examination burden if restriction were not required

because one or more of the following reasons apply:

(a) the inventions have acquired a separate status in the art in view of their different

classification;

(b) the inventions have acquired a separate status in the art due to their recognized

divergent subject matter;

(c) the inventions require a different field of search (for example, searching different

classes/subclasses or electronic resources, or employing different search queries);

(d) the prior art applicable to one invention would not likely be applicable to another

invention;

(e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101

and/or 35 U.S.C. 112, first paragraph.

7. Applicant is advised that the reply to this requirement to be complete must include

(i) an election of a invention to be examined even though the requirement may be traversed (37

 $CFR\ 1.143)\ \text{and (ii) identification of the claims encompassing the elected invention}.$ 

8. The election of an invention may be made with or without traverse. To reserve a right to

petition, the election must be made with traverse. If the reply does not distinctly and specifically

Application/Control Number: 10/507,402 Page 4

Art Unit: 1791

point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

- If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.
- 10. Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 11. A telephone call was made to James Crawford on 24 June 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MATTHEW J. DANIELS whose telephone number is (571)272-2450. The examiner can normally be reached on Monday - Friday, 8:00 am - 4:30 pm.

ou. The examiner can normally be reached on Monday - Friday, 8:00 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson can be reached on (571) 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
